SUMMARY

Senior Software Engineer with 10+ years shipping web products — deep expertise in ReactJS and NextJS architecture, plus 3+ years designing RESTful APIs with NodeJS, MySQL, and AWS. Built and scaled platforms serving 1 million monthly users across stock-media, design-tool, and health-data domains.

EXPERIENCE

WAVEBREAK MEDIA

Full Stack Developer | June 2022 – June 2026 | Cork, Ireland (Remote)

Waveflow — Internal Tool to Track and Manage Products

- Designed and shipped features enabling marketing teams to track product state and sales across product lines, cutting weekly reporting time by 90%.
- Built and maintained RESTful APIs with NodeJS and MySQL serving 50+ internal users across three teams.
- Led the migration of the portal to NextJS, improving page-load performance by more than 40% and reducing code complexity.

Pikwizard — Library of Free Stock Photos, Images, Templates and Videos

- Developed server-side-rendered asset pages (EJS), later re-implemented in NextJS — lifting Core Web Vitals scores and organic traffic by 10% across 100k+ indexed pages.
- Owned API development and maintenance for a library of 10+ million stock assets.

DesignWizard — Tool for Creating Templates, Videos and Images

- Conceived and built continuous artboard-loop playback for all active users.
- Partnered with the AI team on template-recommendation APIs (by region and interest), increasing template engagement.

PageSage — Automated Page Builder for Pikwizard, DesignWizard and WBM

- Architected an AWS SQS-based page builder generating 20+ pages per day across three platforms, eliminating 10+ hours of manual work per week.

DURE TECHNOLOGIES

Sr. Software Engineer | Feb 2018 – May 2022 | Mumbai, India

iMonitor+ / iMonitor NextGen — Real-Time Health-Data Tracking Platform

- Maintained and extended iMonitor+ (HTML, CSS, jQuery), then conceived and led its ground-up ReactJS rebuild as iMonitor NextGen, used by 10+ health organizations in 50+ countries.
- Built a real-time patient-tracking map with Leaflet covering millions of patients across continents.

Avenir Generic Tool — Family Planning Review

- Developed a WHO-data processing tool with filter-based analysis using Vue, translating domain formulae from business analysts into product logic.

CENVEO PUBLISHER SERVICES

Programmer | Jan 2017 – Feb 2018 | Mumbai, India

- Built 5+ e-learning games and courses for Pre-K–12 students, implementing storyboards in collaboration with graphics and instructional designers.

MITR MEDIA & LEARNING

Jr. Programmer | Feb 2015 – Dec 2016 | Mumbai, India

- Developed 20+ math and science simulations in JavaScript from SME storyboards, including 3D simulations built with Three.js.

SKILLS

Front End: ReactJS | NextJS | Redux | JavaScript | TypeScript | HTML5 | CSS | VueJS

Back End: NodeJS | Express | RESTful APIs

Database: MySQL | MongoDB

Cloud & Tools: AWS (S3, SQS) | Git | JIRA | Agile/Scrum | CI/CD (GitHub Actions) | Claude Code | GitHub Copilot | Three.js

EDUCATION

M H Saboo Siddik College of Engineering, Mumbai, India — B.E. in Information Technology | August 2010 - August 2014
